

Measuring Experience

For this assignment, please pick a piece of furniture that you really like (and want to include in your dream room) and measure the:

Length (sometimes also called Depth):

Height:

Width:

For example, if you choose to measure your bed the LxHxW might be:

Length (aka Depth): 77.5"

(Its ok to round to the closest inch)

Height for Headboard: 38"

Height for Platform: 15"

Width: 43.5"

But if you choose to measure a couch or a chair, please include the arms as well so then the LxHxW would be:

Height (total): 32.75"

(Its ok to round to the closest inch)

Seat Height: 19"

Width: 39"

Depth (aka Length): 38"

These furniture examples were taken from DWR, dwr.com has fantastic furniture and design resources.
